

Notice – Temporary Parking Lot Closures | Broadview Danforth BIA

This notice is to inform you of upcoming temporary Green P parking lot closures in your community as the Toronto Parking Authority (TPA) continues to invest in new technology to better meet the needs of our customers.

Where: TPA is temporarily closing 2 Green P surface parking lots in your BIA. Locations and dates were selected based on parking usage data to minimize the impact to local businesses. Signage will be installed two days prior to the closures to inform & redirect customers.

*Dates of Closure (2024)	Car Park #	Address
December 9 & 11 (half of the lot on each day)	CP 78	35 Erindale Avenue
December 10	CP 277	242 Danforth Avenue

*Note this work is weather dependent; dates are subject to change.

When: The parking lots will be closed starting at 10:00 pm the night before the closures, and re-opening after 5pm on the day of the closures. As the sensors are installed, TPA will endeavour to re-open the completed parking stalls for customers.

Why: TPA is installing underground occupancy sensors at the parking lots, which will allow for real-time monitoring and efficient management of parking spaces. This investment will provide our customers with live parking data, which will help them find available parking spots quickly. These sensors significantly enhance our parking management capabilities by monitoring payment compliance, analyzing parking duration and enabling targeted enforcement. Accurately tracking parking compliance helps to ensure fair usage of parking spaces and improves overall compliance with parking regulations.

Green P monthly permit customers will be relocated to an alternative location nearby on the date(s) of the closure.
